1. Product Introduction

1.1 User Guide

This is a new standalone version fingerprint access control device, you can use fingerprint and card to verify. It is very easy to operate, the wiring terminal is the same as the standalone fingerprint access device on the market. User can use this device instead of the card access device or password access device, with that you don't need to change anything. Please use access control power and install it away from the rain. Please don't leave the equipment in the light shine and don't strike it

Specification

Scanner: Optics glass

FAR: $\leq 0.0001\%$

FRR: $\leq 0.01\%$

Recognition speed: $< 1.5s$

Recognition way: 1:N

Fingerprint capacity: 500

Storage capacity: 100000

Communication way: Fingerprint, ID card(Em125khz)

Report: U flash drive to export a TXT file

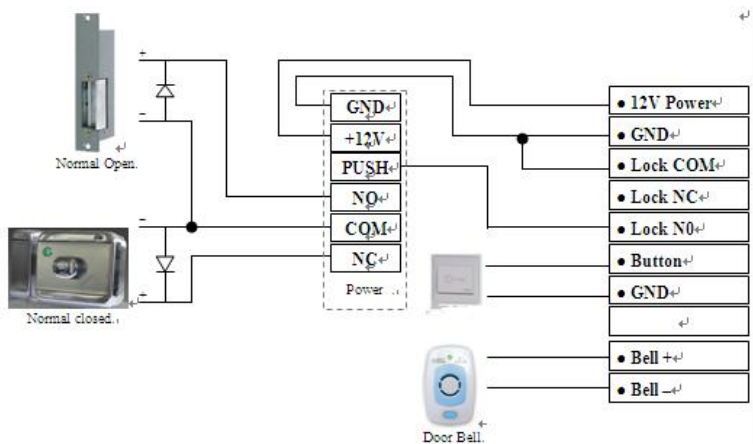

Keypad: 15

Access port: 9 digit (power input/ control the lock/ switch/ doorbell)

Indicate light: red, green and buzzer

Size: 170*65*50MM

1.2 Wiring diagram with access power

1.3 Wiring diagram with normal power

1.4 Keypad

1	No. key 1	8	No. key 8
2	No. key 2	9	No. key 9
3	No. key 3	0	No. key 0
4	No. key 4	*MENU	Set
5	No. key 5	# ENTER	OK
6	No. key 6	IN	In statue keypad
7	No. key 7	OUT	Out statue keypad
		Bell icon	Door bell

Note:

1. The initial admin. password : 1234
